

Evaluation Summary for Lang. Arts & Tech.: Technology Skills (exemplars of technology integration)

TS01 - Use computer-based productivity tools to develop instructional materials that integrate technology to meet the target needs of all students.

(1) Unacceptable	(2) Acceptable	(3) Target
Does not use computer-based productivity tools to develop instructional materials that integrate technology to meet the target needs of all students.	Appropriately uses computer-based productivity tools to develop instructional materials that integrate technology to meet the target needs of all students.	Exceptional use of computer-based productivity tools to develop instructional materials that integrate technology to meet the target needs of all students.

TS02 – Uses assessment data for planning to use technology for instruction.

(1) Unacceptable	(2) Acceptable	(3) Target
Does not use assessment data for planning to use technology for instruction.	Appropriately uses assessment data for planning to use technology for instruction.	Exceptional use of assessment data for planning to use technology for instruction.

TS06 - Locate and evaluate instructional materials that meet target needs of diverse student populations.

(1) Unacceptable	(2) Acceptable	(3) Target
Does not locate and evaluate instructional materials that meet target needs of diverse student populations.	Appropriate evidence of locating and evaluating instructional materials that meet target needs of diverse student populations.	Outstanding evidence of locating and evaluating instructional materials that meet target needs of diverse student populations.

TS07 - Use web-based technology and tools for the development and delivery of instructional materials that are designed to meet target needs of diverse student populations.

(1) Unacceptable	(2) Acceptable	(3) Target
Does not use web-based technology and tools for the development and delivery of instructional materials that are designed to meet target needs of diverse student populations.	Appropriate use of web-based technology and tools for the development and delivery of instructional materials that are designed to meet target needs of diverse student populations.	Outstanding use of web-based technology and tools for the development and delivery of instructional materials that are designed to meet target needs of diverse student populations.

TS08 - Use content-specific technology and/or tools and develop strategies for their integration in the classroom to meet the target needs of diverse student populations.

(1) Unacceptable	(2) Acceptable	(3) Target
Does not use content-specific technology and/or tools and develop strategies for their integration in the classroom to meet the target needs of diverse student populations.	Appropriate use of content-specific technology and/or tools and develop strategies for their integration in the classroom to meet the target needs of diverse student populations.	Exceptional use of content-specific technology and/or tools and develop strategies for their integration in the classroom to meet the target needs of diverse student populations.

TS10 - Utilize and evaluate the effectiveness of instructional materials that integrate technology to meet the needs of diverse student populations.

(1) Unacceptable	(2) Acceptable	(3) Target
Does not utilize nor evaluate the effectiveness of instructional materials that integrate technology to meet the needs of diverse student populations.	Appropriately utilizes and evaluates the effectiveness of instructional materials that integrate technology to meet the needs of diverse student populations.	Outstanding Utilization and evaluation the effectiveness of instructional materials that integrate technology to meet the needs of diverse student populations.
